Sojitz Corporation

Sojitz Receives International Sustainability & Carbon Certification with
ISCC PLUS and ISCC EU Certifications

Sojitz Corporation Tokyo head office (“Sojitz”) has obtained International Sustainability & Carbon Certification (ISCC) with both ISCC PLUS and ISCC EU.

ISCC is an international certification system that utilizes the mass balance method*¹ to monitor and track sustainable biomass and renewable materials in supply chains. Sojitz has received both ISCC PLUS, which applies to food, feed, bio-based products, energy, and biofuels outside the EU market, as well as ISCC EU, which covers biofuels in the EU market.

With this certification, Sojitz will now handle ISCC-certified biofuels and biochemicals.

Sojitz Group companies have obtained the following certifications (as of June 8, 2023).

Sojitz Group Company	Certification	Scope
Sojitz Corporation (Tokyo head office)	ISCC PLUS / EU	Trader
PT. Sojitz Indonesia	ISCC PLUS / EU	Trader
Sojitz (Thailand) Co., Ltd.	ISCC PLUS / EU	Collecting Point / Trader
Sojitz Pla-Net Corporation (Osaka)	ISCC PLUS	Trader
solvadis distribution gmbh (Germany)	ISCC PLUS	Trader
solvadis methanol gmbh (Germany)	ISCC PLUS	Trader
chemfidence services gmbh (Germany)	ISCC PLUS / EU	Trader with Storage

Sojitz positions sustainability as a key management issue and has established the Sustainability Challenge*2 as the company's long-term sustainability vision for 2050. Sojitz aims to realize a decarbonized society by promoting the transition from fossil fuel products to biomass-derived chemicals through a wide offering of environmentally friendly products that contribute to a global society that is both low-carbon and sustainable.

[Related Information]

*1: Mass balance method:

A method used to track sustainability characteristics in products based on the volume of sustainable inputs in cases where products are manufactured using a blend of biomass and circular materials.
